DAIRY CHEMICALS

Northern Dairy Equipment combines traditional values of service with twenty first century vision. Our main goal is to focus on the supply of environmentally friendly products and to innovate in order to meet the challenges of the ever-changing chemical world. We offer these chemicals in different pack sizes. We are competitively priced and can offer bulk discounts along with a fast delivery time.

Footbath Chemicals

IBath Concentrate

Pack Size: 25 litre, 200 litre, 1000 litre

IBath concentrate is a formaldehyde free product with a proven disinfection and high detergency for safe cleaning and penetration of dirty cattle hooves. The product is highly concentrated, with economic in-use dilution rates. Can be used at as little as 1%.

HoofCare Concentrate

Pack Size: 25kg, 200kg, 1000 kg

The most economical footbath solution for dairy cows. A blend of formaldehyde with copper, zinc and aluminium sulphates. Can be used at a low dilution rate of 1%. Can be used in conjunction with Northern Dairy Equipment's iBath.

Formaldehyde 38%

Pack Size: 1000 kg

Can be used in conjunction with Northern Dairy Equipment's iBath.

Pre/Post Milking Teat Dips/Sprays

Preparation of teats prior to milking aims to clean and limit transmission of mastitis causing bacteria through the milking system and safeguard the raw milk supply. Pre-milking teat preparation should assist in stimulating milk let down, speeding up the milking process by attaining peak milk flow faster.

A flexible range of iodine, lactic acid and chlorhexidine based ready to use and concentrated hygiene preparation products with broad spectrum antibacterial control. Contain varying levels of skin conditioners for ultimate udder health.

Protech Plus

Pack Size: 200 litre, 1000 litre

Ready to use pre or post milking teat dip/spray. Based on lactic acid and iodine with a blend of high emollients.

Sanicleanse Concentrate Sanitiser

Pack Size: 20 litre, 200 litre, 1000 litre

Northern Dairy Equipment is the sole manufacturer of this product. It is uniquely formulated with a range of biocides for use with our teat scrubber systems. This product has a quick kill along with a very high number of emollient products including glycerine, sorbitol, aloe vera and peppermint oils.

Udderlac Concentrate 7:1

Pack Size: 25 litre, 200 litre, 1000 litre

This product can be used for pre milking as a foam or spray. Synergised lactic acid based with a high emollient content. Very economical product is diluted 7:1 on farm.

Udderlac Iodine Concentrate

Pack Size: 200 litre, 1000 litre

Iodine based pre/post product can be used for foaming or spraying.

Udderlac Film

Pack Size: 200 litre, 1000 litre

Ready to use barrier dip containing lactic acid film and chlorhexidine with high emollients.

Circulation Cleaners

Pipeline C.I.P AM (Morning Wash)

Pack Size: 200 litre, 1000 litre

Concentrated chlorinated alkaline disinfectant for effective cleaning and disinfection of all types of milking equipment, especially direct to line milking plants. Used primarily after morning milking and in conjunction with Multi Acid PM as part of a balanced 2 stage cleaning program.

Multi Acid PM (Night Wash)

Pack Size: 200 litre, 1000 litre

For effective cleaning and de-scaling of all types of milking equipment, especially direct to line milking plants. Used primarily after evening milking and in conjunction with Pipeline C.I.P AM as part of a balanced 2 stage cleaning program.

Ultra-Acid

Pack Size: 20 litre, 200 litre

Concentrated super high 50% strength phosphoric acid based detergent sanitiser de-scaler. With low foam action, for improving process efficiency of all manual, automated and in-place cleaning. Routine removal of milkstone and hard water films.

Milkstone Remover

Pack Size: 20 litre, 200 litre

A high strength phosphoric acid based detergent sanitiser de-scaler. With low-foam action, for improving process efficiency of all manual, automated and in-place cleaning operations.

Bulk Tank Sanitisers

Effective bulk tank cleaning is another essential element of dairy hygiene and clean milk production. Our range of dairy chemicals includes DX tank cleaner for the effective cleaning of direct expansion milk tanks using automatic wash systems.

DX Tank Cleaner

Pack Size: 200 litre

A strong chlorinated caustic detergent disinfectant with superior clean properties for effective cleaning of direct expansion milk tanks. Very low foam.

Iodine Bulk Tank Cleaner

Pack Size: 200 litre

A bactericidal acidic liquid detergent sanitiser for automatic cleaning of bulk tanks. The high acid content of this product aids in the prevention of milkstone. Contains iodine.

Hard Surface Detergents & Disinfectants

Bactocleanse Concentrate

Pack Size: 20 litre, 200 litre, 1000 litre

Northern Dairy Equipment is the sole manufacturer of this product. It is uniquely formulated with a range of biocides for use with our teat scrubber systems. Can also be used through cluster flush systems. Quick kill disinfectant, non-hazardous, non-toxic and non-corrosive making it safe on human and equipment.

Peracleanse 5%

Pack Size: 220kg, 1000kg

High level food industry disinfectant based on 5% w/w peracetic acid. Highly effective product that can be used through Northern Dairy Equipment's teat scrubber systems and also cluster flush systems.

Red Label Hypochlorite

Pack Size: 25 litre, 200 litre, 1000 litre

10-11% stabilised sodium hypochlorite solution. Can be used for cleaning paving and also for use in swimming pools as a steriliser.

Quatsan

Pack Size: 25 litre, 200 litre

Powerful single step detergent sanitiser containing a synergistic blend of QACs.
